

Plasma Collection Solution

More personal. More plasma.

HAEMONETICS®

More personal. More plasma.

Donors come in every size.

Now, so do collection volumes, with the **Persona™ Plasma Collection Solution**.

Persona™, a proprietary integrated plasma collection solution built upon the **NexSys PCS® platform**, is the first and only donor-tailored solution clinically shown to yield +9% to 12%* more plasma per donation on average to maximize both cost-efficient output and patient impact.

+9% to 12%* AVERAGE INCREASE
IN PLASMA VOLUME

*Based on baseline device, software configuration and donor population

THE PERSONA™ NOMOGRAM

The Persona Plasma Collection Solution uses the **Persona Nomogram**—a novel, personalized percent plasma nomogram that tailors donation targets to each donor based on total available plasma. This allows an overall average increase in plasma volume collected per donation. Unlike the simplified nomogram in place in the United States since 1992, which was based solely on weight, the Persona Nomogram is based on body mass index (BMI) and hematocrit.

Persona Nomogram

WEIGHT

INDIVIDUAL DONOR-TAILORED COLLECTIONS

A **transformational approach** to plasma collection, the Persona™ Plasma Collection Solution enables a more tailored collection target using donors' individual characteristics.

Plasma collection becomes **more personalized** to better align with an individual's body composition.

NexLink DMS® software with Persona™ Technology seamlessly enables plasma collections using the Persona Nomogram.

HIGHER PLASMA YIELDS

Uses the Persona™ Nomogram to collect a consistent percentage of plasma volume based on height, weight, BMI and hematocrit across all donors, up to a maximum of 1,000 mL, resulting in **an average increase in plasma volume collected per donation**.

New larger Persona Plasma Pooling Bottle accommodates increased donation volumes.

IMMEDIATE AND LONG-TERM GROWTH VALUE

Persona™ can **immediately increase collection volume output** from existing plasma centers, providing a new option to meet the growing demand for plasma. Persona can also increase productivity of potential future plasma center expansions.

Longer-term, more personalized experiences can meaningfully increase loyalty and trust, according to research.* This potentially leads to **improved quality and longevity of donor relationships**, meeting head-on the difficulty of cost-effectively expanding a donor base and improving retention.

Persona Service and Support offers **fully supported implementation** and **overnight conversion** to minimize disruption to center operations.

A TRANSFORMATIONAL APPROACH LEVERAGING THE PROVEN NEXSYS PCS PLATFORM

The Persona™ Plasma Collection Solution is built upon the NexSys PCS®/NexLink DMS® integrated platform, which has been shown to deliver:

- ↑ plasma yield: +3% (with YES® Yield Enhancing Solution)
- ↑ productivity: increased average turns/device/day
- ↑ quality/compliance: fewer errors
- ↑ donor satisfaction: quieter with more procedure progress information
